

## 173.7 Cobble Bar

Surface was created by subtracting the April 2, 1996 surface from the July 8, 1996 surface. This image shows positive and negative changes between the two survey dates. The zero datum is between the light and dark yellow colors. Color bands represent 6-inch increments.

**Figure A.6. This image shows positive and negative changes between April 2, 1996 and July 8, 1996.**

## 173.7 Cobble Bar

Surface was created by subtracting the April 2, 1996 surface from the July 8, 1996 surface. This image shows positive changes with the zero datum as a grey planar surface. This image is identical as the above image, but all negative changes are hidden below the grey surface.

**Figure A.7. This image shows positive changes with the zero datum as a grey planar surface.**
